Title: 2016 PIMS-UBC Statistics van Eeden Lecture

Event Type: Lecture-Seminar-Series

Location:

University of British Columbia, Vancouver

Dates:

Jan 18-19th, 2016

Topic:

Bi-cross-validation for factor analysis

Methodology:

Graduate students at the statistics department selected the speaker and topic. The invited speaker met with students and faculty members individually/in groups and over lunch and dinner. The speaker gave a public lecture that was attended by graduate students and faculty from various departments.

Objectives Achieved:

Students and faculty members at UBC learned about the new developments on bi-cross-validation of factor analysis. We also had in-depth and beneficial discussions with the speaker on various statistical topics.

Organizers:

Liu, Yang, Department of Statistics, UBC

Hoegg, Tanja, Department of Statistics, UBC

Speakers:

Prof. Art Owen, Department of Statistics, Stanford
