Applied Combinatorics

The Applied Combinatorics summer school is a two week program of minicourses and exploration sessions. It is designed to give students state of the art knowledge of combinatorial techniques and open problems in physics, chemistry and biology.

The program is suitable for graduate students in combinatorics as well as those who are interested in using combinatorial tools in their work.

MAIN LECTURERS:

Thomas Prellberg, Queen Mary University of London

Éric Fusy, École Polytechnique

Erik Panzer, Institute des Hautes Études Scientifiques

Christine Heitsch, Georgia Institute of Technology
