

Conference on Geometric Analysis

The University of British Columbia

24th-28th July, 2017

The conference marks the second joint event of the International Collaborative Research Group (CRG), which includes Australian National University, Beijing International Centre for Mathematical Research, Pacific Institute for the Mathematical Sciences, The University of British Columbia, and University of Washington. It aims to survey the state-of-the-art advances in areas of geometric analysis, differential geometry, and nonlinear partial differential equations. The conference in part celebrates Professor Gang Tian's 60th birthday.
