Title: Cohomology and Support in Representation theory and related topics
Event Type: Summer-School

Location:
University of Washington, Seattle, WA, USA

Dates:
Summer school: July 27-31, Workshop August 1-5, 2012

Topic:
Representation theory, category theory, commutative algebra, and their interactioncs

---

Methodology:
Summer school consisted of three series of lectures complemented by problem-solving/discussion sessions led by the younger researchers who assisted the lecturers. Notes and problems for the minicourses are available on the summer school website. The workshop included a poster session where young participants were able to display and discuss their work.

Organizers:
Christopher Bendel, Mathematics, University of Wisonsin, Stout; Henning Krause, Mathematics, University of Bielefeld, Germany; Daniel Nakano, Mathematics, University of Georgia (summer school only); Julia Pevtsova, Mathematics, University of Washington

---

Speakers:
see http://www.math.washington.edu/~pischool/ for the summer school and http://www.math.washington.edu/~pischool/Abstracts.pdf and for the workshop. The abstracts for the workshop are uploaded as a separate file.

Links:
The main conference website has links to all the information relevant to the event: abstracts notes, references, etc. http://www.math.washington.edu/~pischool/

File Uploads:
Additional Upload 1: http://www.pims.math.ca/files/final_report/AbstractsSmall.pdf
