Miniconference: Combinatorial Structures in Perturbative Quantum Field Theory

Date:

March 21, 2016.

Location:

Simon Fraser University, Burnaby, BC, Canada, [room K9509](#)
[directions](#) to campus.

Topics:

- Combinatorial interpretations of the perturbative expansion
- Renormalization group equation
- Combinatorial Fourier and Legendre transforms
- Dyson-Schwinger equations
- Combinatorial Hopf algebras

See [links](#) for more details and references.

List of participants:

Paolo Aluffi, Florida State U.
Nick Beaton, U. Saskatchewan
Michael Borinsky, Humboldt U.
Julien Courtiel, SFU
Iain Crump, SFU
Mohamed Laradij, SFU
Matilde Marcolli, Caltech
Ben Moore, SFU
Alejandro Morales, UCLA
Emad Nasrollahpoursamami, Caltech
Erik Panzer, Oxford
Julian Purkart, Humboldt U.
Matthew Schmirier, U. Saskatchewan
Chris Soteros, U. Saskatchewan
Karen Yeats, SFU

Organizers:

Alejandro Morales, ahmorales@math.gmail.com
Karen Yeats, karen_yeats@math.sfu.ca

Support:
