

Submittee: Ozgur Yilmaz
Date Submitted: 2012-11-08 13:22
Title: Joint Alberta - BC Seminar
Event Type: Conference-Workshop

Location:
The University of British Columbia, Vancouver BC

Dates:
August 7 - 10, 2012

Topic:
Applied and computational harmonic analysis

Methodology:
Lectures and informal discussions

Objectives Achieved:
Our main objective in this workshop was that it serve as a platform where CRG members can present their recent research, interact, and start new collaborations. For this purpose, we invited CRG members and their students/PDs and gave everyone the opportunity to talk on their research. We believe that this provided valuable experience to the junior participants and exposed them to cutting edge research directions in the field. Furthermore, new interactions have been initiated during the workshop between CRG members.

Organizers:
Yilmaz, Ozgur, Mathematics, University of British Columbia // Han, Bin, Mathematics, University of Alberta

Speakers:
