Title: Connections Between Algebra and Geometry
Event Type: Conference-Workshop

Location:
University of Regina

Dates:
May 29, 2012 - June 1, 2012

Topic:
Algebra and Geometry

Methodology:
Lectures and problem sessions

Objectives Achieved:
(1) The workshop introduced participants to current research topics in the intersection of Algebra and Geometry; (2) The workshop consisted of three courses for graduate students and recent Ph.D's that partially prepared participants for one of the special sessions being organized at the 2012 CMS Summer Meeting; (3) The workshop created preliminary working research relations by incorporating plenty of time for discussions in which participants exchanged ideas with one another; (4) The workshop provided a venue in which participants interacted with leading researchers in Algebra and Geometry; (5) The workshop resulted in course notes for each of the courses.

Organizers:
Cooper, Susan, Department of Mathematics, Central Michigan University// Sather Wagstaff, Sean, Department of Mathematics, North Dakota State University// Stanley, Donald, Department of Mathematics and Statistics, University of Regina

Speakers:
