Title: Random Walks in Random Environments

Event Type: Conference-Workshop

Location:

Univ. of B.C.

Dates:

15-19 June 2009

Topic:

Random Walks in Random Environments; more generally models in probability and statistical mechanics involving various random extensions of classical random walk

Methodology:

Lectures

Objectives Achieved:

Too soon to say

Scientific Highlights:

This was generally felt to be an excellent meeting, with a very high quality of international participants, and strong talks.

Organizers:

Martin Barlow (UBC), Erwin Bolthausen (Zurich), Ofer Zeitouni (Weizmann/Minnesota)

Speakers:
