

México City, september 1st., 2011

**Prof. Alejandro Adem,
PIMS Director**

Dear Prof. Adem

We wish to thank you once again for the support granted by PIMS to the World Conference “**35th CONFERENCE ON STOCHASTIC PROCESSES AND THEIR APPLICATIONS**”, which took place from June 19 to June 24, 2011, in the city of Oaxaca, Oax. México. Enclosed you will find copy of the Program.

This support was given to two of our Plenary Speakers:

- 1.-Prof. Louigi Addario-Berry (University of Montreal), who presented the plenary talk “Cutting down trees with a Markov chainsaw”; and
- 2.- Prof. Omer Angel (University of British Columbia), whose plenary talk was “Percolation on infinite random planar maps”.

In the Conference we had the participation of several other Canadian mathematicians, two of them (young mathematicians, invited to a special session) also received a partial support from PIMS:

- 1.-Prof. Alex Bloemendal (University of Toronto), which delivered the invited talk "Finite rank perturbations of large random matrices" and
- 2.-Prof. Sebastian Andres (University of British Columbia), which delivered the invited talk "Invariance principle for the random conductance model".

The support given to this Conference was not only very useful in these four cases, but this also had the effect of encouraging other Canadian mathematicians to come to Oaxaca.

Sincerely yours

Prof. Ma. Emilia Caballero
Chair of the Local Committee, SPA 2011

We enclose

- 1.-the reference of the IMS review of the Conference:
http://bulletin.imstat.org/wp-content/uploads/Bulletin40_6_sm.pdf
- 2.- The home page of the event
<http://www.matem.unam.mx/SPA2011>
- 3.- The program and the booklet will be sent by regular mail.
