Title: The 10th annual PIMS Young Researchers Conference in Mathematics and Statistics

Event Type: Conference-Workshop

Location:

University of Alberta

Dates:

May 21 - 24, 2013.

Topic:

General conference in Mathematics and Statistics for young mathematicians.

Methodology:

Regular talks, plenary talks, and a two-part workshop.

Objectives Achieved:

Interactive workshop: The participants were very enthusiastic about the workshops. They indicated that, although they had attended many academic talks, they had never had formal training in this vital aspect of their professional development. They found the material presented in the workshop to be exceptionally useful and many students who gave their talks after the conclusion of the workshops incorporated what they have learned into their presentations.

Scientific Highlights:

The participants found the material presented in the plenary talks to be exceptionally interesting and were impressed with the calibre of the plenary speakers. The audience was engaged and had numerous questions for the speakers.

Organizers:

See uploaded file.

Speakers:

See uploaded file.
